TELEGRAMS

(By Havas Agency)

Paris, April 17th—The majority of the Conseils Generaux throughout France are in favour of the adoption by the Government of the system of commercial protection.

Berlin, April 17th—The Hanover election, in which Bismark was at the head of the poll, has resulted in a "tie;" another election will, therefore, be held.

Vienna, April 17th—Herr Pechy de Pechyfala has been re-elected President of the Austrian House of Representatives.

Lisbon, April 17th—The Minister of Public Works having insisted on his resignation, it has been accepted; the remaining Ministers continue in the Cabinet.

Paris, April 17th (evening)—M. Jules Cambon, the Prefect of the Department of the Rhone, has been appointed Governor-General of Algiers in the stead of M. Virman.

IMMIGRATION TO S. AMERICA.

It is time for the British Government to take some decided steps to prevent foolish people in England and Ireland from being deluded by the "drummers" of the Argentine, Brazilian and other S. American states who have been carrying on their propaganda without interference. The promises held out by these "drummers" are of the most attractive kind, viz:

1. Free land grants of 100 acres.
2. Cows, horses, implements, &c.
3. A healthy and invigorating climate.

So far the only condition fulfilled is the climate (as regards settlers in Argentina) but people cannot subsist on climate only. The Government ignore the other promises, because they never authorized the "drummers" to make them. It has been stated, we know not how correctly, that the Argentine Government paid a fee of 12 hard dollars per head on the emigrants entrapped by these promises, but whether or not this be so we know as a fact that the Argentine emigration agents in Cork and elsewhere induced the Naposta colonists and others to come to Buenos Ayres.

As regards British emigrants to Brazil they have not even the advantage of a healthy climate. The Potosi brought 100 last week, and as these poor people are unable to toil in the coffee-plantations and sugar-fields, their condition must be pitiable in the extreme. The following melancholy story of a married couple who were brought out in the P.S.C. steamer Liguria only three months ago, is taken from the *Rio News* of the 7th inst.:—

"About the latter end of January of the present year amongst the emigrants brought to Rio de Janeiro were William Grant and his wife; this couple on arrival were sent to the emigrants' island in accordance with the regulations. A few days passed when Mrs. Grant was sent to the hospital and was about to change her attire for hospital clothing when, before she did so, she wished her husband to be sent for. The authorities declined to permit the man to enter the women's ward, upon which Grant ordered his wife to come out and go over to the city. A few days after I saw them, and the wife carried a baby in her arms The child was born perfectly healthy and strong. Owing to exposure and want of nourishment it only lived a few days. The father, in order to obtain burial for it, was compelled to carry the little body in his arms to the Misericordia Hospital, but was informed that nothing could be done for him there, and he was sent forth with his ghastly burden to patrol the streets. Some gentlemen took the matter in hand and the body was finally buried. The father, whatever he might have been before, from that time never held up his head, took to drink and died of yellow fever on the 21st inst. On the 27th inst. I had the pleasure of taking the widow on board the s.s. Arawa, her passage to England being paid by subscription. Mrs. Grant, just previous to my leaving her, begged me to convey her heartfelt thanks to the several captains and gentlemen who from time to time assisted her, also to the persons who kindly raised the subscription which supplied the necessary funds to pay passage money to England and incidental expenses.

"By way of conclusion, permit me to ask a very pertinent question: how does the Brazilian or British Government benefit by such transactions as this in matters of emigration? If the above mentioned governments do not benefit, who is responsible for the lives of this man and child?

Enode."

We are happy to say that the Argentine Government has for the present dismissed the "drummers" in Cork and Limerick, but this is not sufficient. The Minister of Foreign Affairs ought to publish a notice in the principal newspapers of London, Dublin and Glasgow to this effect:

"Whereas thousands of industrious "persons are at present unable to ob- "tain employment in Buenos Ayres, "and the wages of an ordinary laborer "are less than 18 pence daily, the Ar- "gentine Government cautions intend- "ing emigrants from coming to Buenos "Ayres until further notice".

Every steamer that leaves our shores takes hundreds of working-people back to Europe. There is really no employment for thousands who are still here, and, as President Pellegrini recently declared in a speech at the Government House, this is a state of things that cannot be regarded without anxiety.

We must do everything we can to check immigration, especially as Mr. William Wilson of London and other amateur economists think that Argentina only needs a great influx of settlers from Europe.

THE MURRIETA CONVERSION.

(From the "Times," March 20th.)

We are glad to be able at length to put an end to the rumours which have been circulated for some time past with reference to an eminent Spanish financial house in this City, by the authoritative announcement that arrangements have been completed for the conversion of the business of Messrs C. de Murrieta and Co. into a limited joint-stock company. The capital will consist of £1,500,000 in fully-paid shares; of £1,000,000 in shares upon which one-half of the capital will be called up, and of £1,000,000 in Five per Cent Debentures at par, £400,000 having been carried to reserve, making in all £3,900,000. It is estimated that, in the possible event of the half million of uncalled capital being at any time required, the private property of the members of the late firm, who will among themselves take the whole of the share capital, will be fully equal in value to £500,000. The whole of the debentures have, we understand, been taken by leading houses in the City, a circumstance which is not considered surprising by those who are more intimately acquainted with the lucrative nature of the firm's business, which has for the 5 years ending Dec. 31, 1889, we are informed, amounted to a sum exceeding £300,000 per annum. No change will be made in the 'personnel' of the house, and the business in all its branches will continue to be conducted as heretofore. Surprise may perhaps be felt in some quarters that so important a step as the conversion into a company of this business should have been decided upon in existing circumstances; but when it is seen that practically no appeal is made to the public to subscribe any of the capital, it matters little what is the disposition of the public towards new companies generally at the moment when the change takes place. No good purpose is, however, to be served by endeavouring to conceal certain facts in connexion with the conversion of the business of this firm into a joint-stock company, and we can confirm the general impression that this, which is in other respects one of the finest businesses in London, has been to a rather serious extent prejudicially affected by undue commitments on the part of the firm for railway and other loans, principally in connexion with the Argentine Republic. The firm were continually coming under new obligations, before prior operations had been completely financed and disposed of, involving large expenditure to contractors and engineers, simultaneously with only a limited response from the public for the new securities offered for subscription, and their resources, which were also being drained away owing to apprehension arising out of other well-known difficulties, were not found equal to the strain. A most complete and thorough examination of the assets and liabilities of the firm was, of course, a "sine qua non" before a reconstruction under the guidance and assistance of powerful capitalists could be entertained. This laborious investigation has been undertaken by the Trustees, Executors, and Securities Insurance Corporation, and has resulted in this powerful corporation deciding to associate itself with the practical steps necessary to carry the matter to a conclusion. We believe we are right in saying that the lines upon which the Trustees and Executors Corporation have arranged for the conversion of the business of this firm into a joint-stock company meet with approval in the highest quarters in the City. The announcement we have made will meet, we feel sure, with general satisfaction, and tend to remove the feeling of distrust and apprehension which has for so many weeks injuriously affected the course of business.

MANIFESTO OF THE NATIONAL PARTY.

The exceptional political situation through which the Republic is now passing and the financial difficulties which are liable to be accentuated by a burning struggle in the approaching elections for President and Vice-President of the Republic and for Deputies to Congress, have created the conviction amongst the inhabitants of this country of the necessity of a patriotic accord amongst all parties, with the idea of finding the means of arriving at a decorous and equitable solution which may respond to the requirements of public opinion and to peace, so necessary to the present and future of the Nation.

In furtherance of these lofty aims, citizens of the highest political position, belonging to different parties, have made a public manifestation of their decided and favourable political opinions.

The undersigned, appointed at a meeting of citizens recently held in this capital, having been entrusted with the duty of communicating with our co-religionists of the Republic, invite them to join forces to organise the Central Board of the National Party, to be composed of delegates from the Capital and the Provinces, in number equal to half the electors of the President of the Republic.

This assembly will bear the character of an electoral convention for the nomination of candidates for the Presidency of the Republic, exercising the management of the party in proper form, making patriotic agreements with other parties, or, if this be not possible, taking steps with reference to the attitude which the National Party should assume as events progress.

In fulfilment of this mandate, we apply to you to add your patriotic efforts to this work of peace and conciliation and to adopt the means to ensure the nomination of delegates for your Province, it being understood that as soon as they meet, our mission is at an end.

In the hope of obtaining your valuable co-operation, we salute, etc. (Forty-seven signatures follow.)

THE RIVER PLATE TRUST, LOAN AND AGENCY COMPANY.

Report of the Tenth Ordinary General Meeting. In the absence of Mr. John Morris, Chairman of the Company, Mr. William Wilson presided.

The Chairman: At a time such as the present, when there is a want of full confidence in even the soundest undertakings, I think it is the duty of directors to take their fellow-shareholders very fully into their confidence. I am anxious that you should all leave this meeting fully appreciating the value of your shares and with confidence in the future of the Company. I shall be very careful not to say anything that can possibly be characterised as misleadingly sanguine.

During the past year the market has not been a favourable one for placing debenture stock, and as we had sufficient from our calls to meet our immediate requirements, and as after the disturbances which occurred in Buenos Ayres in July last, we did not consider ourselves justified in greatly extending our business in the River Plate until a more settled state of matters prevailed, we did not make any great efforts to increase our terminable indebtedness. We, of course, cannot be called upon to pay any of our permanent debenture stock, and as regards our debentures, when we come to deal with the assets, I shall be able to show you that with our balance at the bank, our loans and our investments, we have ample means to meet any calls that may be made upon us, even if the whole amount were called up.

Some of our borrowers, whose interest was overdue on December 31st, had not paid, because they had not sold their produce. Some are men of good standing and considerable capital, and there is little doubt that they will pay. The Board cannot, however, conceal from itself the fact that the depreciation of paper and the singularly trying times in the River Plate, have been weighing heavily on some of our borrowers, and that, with a very few of them we may have difficulty, and may even have to resort to extreme measures. We are always considerate with our borrowers, and, under existing circumstances, we are bound to be as forbearing as we can without risking the interests of the Company. Our losses, if we have any losses, are not likely to be serious, and carrying forward to next year's Profit and Loss Account the amount we do, viz., £21,746.5s. 4d., we, I believe, place ourselves in a position to more than meet any possible loss. We have next investments, £462,065. The Board could not, of course, foresee a crisis of the serious nature of that which at present prevails in connection with River Plate affairs, but for the last two years (although we have hoped until recently that a crisis might be avoided) it has been clear to us that a serious crisis might occur, and being anxious to be prepared, we have kept our securities at such a valuation as would ensure their being safe, even in the event of a considerable fall in values. This, and the fact that we hold many securities which are not liable to much depreciation (securities some of which we originally took from the Mercantile Bank), will account for our not having had to write off more than £15,000, which sum, with investments amounting to £462,000, may seem to you a small amount. Our investments have been gone through very carefully, and we believe that, after allowing for the £15,000 of provision, as already mentioned, they fairly represent the amount which appears against them in the accounts. Matters will become serious indeed, if the quotations for such things as Water securities and Consols have yet to fall much further, and we hold considerable amounts in such securities. We hold over £200,000 in Gas and Water securities, and we hold £50,000 in Consols. These Water securities are, to some extent, represented by our interest in the Montevideo Waterworks, which is a thoroughly prosperous undertaking. The next item in the accounts is loans, sundry debtors and constituents' balances £201,643.

This is chiefly loans on this side against collateral securities. You will observe that we have a balance of £88,576 at our bankers.

Our advances on mortgages are, as you have frequently been reminded, all made in gold, and are repayable in gold. The advances have been made in two countries, and chiefly on three classes of property. They have been made in the Argentine Republic, and, to a very much smaller amount in the Republic of Uruguay; and they have been made on estancias or stock farms, on town or house property, and on small agricultural farms. In advancing on an estancia, we are not influenced by the inflated prices quoted for land; we take as the value of an estancia a sum on which the products from the place will, under ordinary circumstances, give a good return, and then we advance only a fraction of that value.

Our borrowers on small agricultural farms are not men of large capital, but we have endeavoured to lend only to honest, industrious men, and these men are not likely readily to abandon land which they have toiled to acquire, a house into which they have put the savings of years, and a home where their children have played, and where they have watched these children growing up around them. Nor need these farmers have any great difficulty in meeting their interest.

A report of great progress for the past year cannot be expected from companies connected with the River Plate. We have, however, had an opportunity of satisfying ourselves as to the soundness of our business, we have earned a large amount of money and we have made some progress, and if our progress has not been so great as during some previous years, we have, at least, learned lessons and we have gained experience that will be worth something to us in the future. Now, gentlemen, all these facts and figures, showing the financial strength and the earning power of the Company, and the care with which the Company is managed, should, I think, be reassuring to you, and I trust you will be satisfied that we are doing a safe, a sound and a progressive business.

An annual tax of 7 per cent. has been imposed by the Argentine Government on the profits of joint stock companies. The tax being calculated to drive foreign capital from the country, being very unpopular, and having been proposed by the Minister of Finance under a serious misapprehension as to the profits of joint stock companies, it is probable that the law imposing it may be repealed. If it is not repealed we must pay the tax, but as we shall have it in our power to raise our interest rates, the tax will not weigh on us to the extent that may at first sight appear.

You may have seen that the payment of interest on the bonds of the Entre Rios Central and the Santa Fe and Reconquista Railways having been deferred by the Entre Rios and Santa Fe Governments respectively, we have been acting for the bondholders. The Trust Company did not issue the bonds of these railways, but having some years ago been asked to act as Trustees for the bondholders, the Directors readily agreed to do so. We are now doing all we can for those interested, and hope to be able to make satisfactory arrangements for them.

Mr. R. J. Neild: The business which is carried on in the Argentine Republic is in my judgment divisible into two large groups. All those undertakings which have been formed on their own merits, which look to their own intrinsic advantages for their profit, and which retain themselves, so far as possible, on what is commonly known as a gold basis; these form one group. In that group, theoretically, there is no disturbance whatever. Read the Report of the Buenos Ayres Great Southern Railway Company which has got into the newspapers, and you will find there is nothing there to give cause for alarm at all. Read the eloquent figures of the Balance Sheet of the River Plate Trust and Loan Company, and I think everyone who holds shares in that Company will think they hold about as sound and good a thing as it is possible to get. On the other hand, there is a vast group of businesses or investments which are connected with railways and other public works, which have been formed, possibly through an erroneous, possibly through an ill-considered idea of the necessities of the country, and the present trouble all lies in that group. Now, the circle which comprises those businesses which I have described as being on a paper basis has been up to the present a continually enlarging circle, and whereas the gold circle went on quite happily and independently of the paper circle for a long time, there came a time when the paper circle increased and took a bite out of the gold circle, and during the last three or four months there have been moments when it looked within the bounds of possibility that the paper circle might swamp and engulf the other. Altogether, I believe that we may hope that that danger has been averted. I believe if more loans by this country had been granted that it would have been ensured later on. I believe in people who protect themselves by using their own money. The danger is, to say the least of it, very remote indeed. The Government resorted to the expedient of a few days' holiday. I dare say that sounds to you very strange, but it was efficacious. In the meantime they started a popular loan, and every English company that I know of subscribed to it, and this Company, being proportionately interested, subscribed also, and I think the shareholders will approve of the Directors' action in doing so.

A Shareholder: To what extent? Can you tell us?

Mr. Neild: Between the Mortgage and the Trust Company together they subscribed 500,000 national dollars currency, which at the rate of exchange of to-day is approximately 22,000 sovereigns.

The Chairman: Mr. Anderson will read the next Resolution.

The Manager: The Resolution is—"That the following Dividends be and are hereby declared payable on the 1st April next:—On the 'A' Shares (£2 paid) at the rate of 9½ per cent., making with the interim dividend of 9½ per cent., the fixed dividend of 18½ per cent. for the year; on the new 'A' Shares, at 18½ per cent. per annum on the instalments paid up; on the 'B' Shares (£5 fully paid) at the rate of 2½ per cent., making with the interim dividend of 2½ per cent., the fixed dividend of 5 per cent for the year; on the new 'B' Shares, at 5 per cent. per annum, on the instalments paid up."

The Chairman: I beg to move that Resolution, Gentlemen.

Mr. J. H. Duncan: I beg to second it.

The Resolution was put and carried unanimously.

THE RIVER PLATE TRUST COMPANY.

The meeting of the River Plate Trust, Loan and Agency Company yesterday acquired special importance from the fact that the year placed under review in the Chairman's speech covered all the stirring events both here and in South America which have made the position of Argentine affairs the burning financial question of the day. The Report showed that the profits of this important Company had not been affected, as, after paying the usual handsome dividend and writing £15,000 off the investments, there remained a balance of £21,746 to carry forward, against £5,171 at 31st December, 1889. The explanation, of course, is that the company's advances are all made on a gold basis, and that its revenue does not directly suffer from the depreciation of the paper currency. It certainly appears surprising that the indirect effect should be so small, but on examination this surprise diminishes. The produce which supplies the money to meet the interest on the Company's advances is also sold on a gold basis, because the greater part of it is produced for export. Thus, if a borrower has to pay a thousand dollars in gold to the River Plate Trust Company, it costs him three thousand five hundred dollars at present to provide this; but, on the other hand, the produce, which with gold at the par of the national paper currency would sell for a thousand paper dollars, now brings him in the three thousand five hundred dollars which he requires to meet his interest payment.

The extent of the possible loss on the year's working is represented by an item of £,8,356 for interest due on mortgage loans. Regarding this, the Chairman explained that some of the borrowers had not sold their produce up to the end of the year; that others, whose payments had, for various reasons, been delayed, were perfectly safe; and that the residuum about which there was any real danger of default was a very small one. The balance of £21,746 carried forward was, he considered, amply sufficient to meet any possible losses during the current year. The £15,000 written off the value of the company's investments seems small in view of what is known as to the position of other institutions interested in Argentine stocks, but is only another proof of excellent management. That it is sufficient for the purpose is due, in the first place, to the fact that the securities were previously valued at a very low figure, and, in the second, to their being of a kind which has not depreciated to a serious extent.

Regarding the position and prospects of the Argentine Republic, Mr. William Wilson, who presided, made some interesting and weighty remarks. While owning frankly that the country was still in a critical state, he gave it as the opinion of the Board that there was no ground for serious apprehension as to the ultimate future. Its affairs had got into a mess, but great efforts were being made to get them right again. That these efforts will prove successful is rendered more probable by the fact that all the recent troubles have their origin in the currency. The wealth of the country is as great as ever, and its development has hardly yet commenced. Assuming that a sounder financial policy will now be adopted, what is wanted is more population. This is Mr Wilson's panacea, and, no doubt, it would be an effective one, but the present difficulty is that there is very little inducement to emigrate to the Argentine Republic. Argentines must not count upon immigration to a large extent until they have brought their currency into relation to the prices of foreign commodities. The relief which the Funding Loan gives them will help them to attain this end. But it is an end which will have to be attained by those whose mal-administration produced the present state of affairs. When a settled state of affairs is arrived at, and not before, we shall see the flow of immigration and of fresh capital which are necessary to set Argentina on the way to real prosperity.

We commend to the special attention of all interested in Argentine affairs the remarks of Mr. R. J. Neild at this meeting. It is necessary, as he pointed out, to divide Argentine investments into two distinct classes—those having a paper and those having a gold basis. The former are subject to perpetual disturbance; the latter are theoretically subject to no disturbance from this cause. The Government External Loans had practically a paper basis, but their interest was payable in gold. Taxes did not, like sales of produce, realise more in paper if the gold premium rose; and when, as at present, it takes three hundred and fifty paper dollars to realize a hundred dollars in gold, it is obvious that no ordinary increase of taxation could meet such a strain. The best news which has come to hand from Buenos Ayres recently is that of the issue of an Internal Loan, which will involve a fixed charge in national currency.—*Financial Times.*

CAPTAIN CILLEY'S ADVENTURES AND EXPLORATIONS IN BAHIA NEGRA, BOLIVIA.

CHAPTER VII.

(Continued.)

October 6th.—The morning broke misty and foggy, and my eyes were barely opened when Santos called out, "Ouey! ouey!" Not comprehending him I asked what he meant. He pointed with his finger, and, following its direction, I saw a noble-looking buck just emerging from the forest about 100 yards distant.

A shot from my Winchester rifle "tumbled him," and, in a few moments, his skin was stripped off and select portions of his carcase were roasting before the fire and we breakfasted heartily. Santos stows away a surprising quantity, and it doss one good to see him eat. We roast enough to last us two days, and hang the remaining portion high above the ground, with hardly a hope that the buzzards will spare it. The hide makes us moccasins, which protect our feet from thorns and cut grass, though they do not last long travelling in wet places.

We start at 9 a.m., and about 100 yards above our camping ground we come to the termination of these woods, and find another mound, from which we have an excellent view of the ridge, which bears from E. by N. to N.N.E. We crossed the level depression, which separated us from it, in water from the ankle to the knee in depth, through brambles and thorny bushes, scattered palms and ostio trees at intervals. Two hours' heavy and tiresome walking brought us to the foot of the ridge about midway of its length. Here is a dense and tangled undergrowth, and the ground is rooted up in many places by wild hogs. We ascend to the summit of the ridge, which is about a league long, quite narrow, and one hundred and fifty feet high; it is composed of red and white sandstone, thrown up by some violent convulsion of nature in the most confused and irregular masses, and growing from every square inch of arable soil between them are many species of the prickly cactus and thorny plants, which render our ascent anything but easy or pleasant. Immense trees of many kinds, the mimosa class predominating, fill the sides and crest. We ascend with great labour a lofty tree, but intervening trees prevent me obtaining a view in the desired direction. The ridge runs in a N.N.W. and S.S.E. direction.

Descend the tree and hill, and an hour's walk takes us to near the north-western termination of the ridge; we round it waist deep in water, cutting our way through the bushes that grow from the bottom. In bending aside a limb, I nearly grasped a small brilliantly marked snake that was entwined around it. I called Santos to look at it, and he told me that it was one of the most venomous snakes of the country and its bite fatal, so I chopped it into several pieces with my hunting knife. Ascended the ridge at this end which is bluff like and from a tree obtained a good view. Yacadigo mountain looks a good distance away to the N. E. and seems the South Eastern termination of a range from the northward and eastward. To the E.N.E. is a pyramidal hill, separated from us by a clear, level, grassy space with patches of open water. To its right and far distant are the mountains of Albuquerque. To the north east the Curumba saddle is plainly visible. The next hill in this range is about a mile distant to the N.W. by W., and beyond in the same direction are other hills.

This range is undoubtedly the southern water shed of the Otuquis and San Rafael rivers, and the same that is called a rising ground by Vargas, who struck it after the crossing the San Rafael river from his estancia at the foot of the Santiago range, and followed it to its termination near the Bahia, a point which he called Reyes.

Camped for the night at the foot of the bluff on a slope, and its inclined position did not favor sleep, though it rested our bodies. My sensations during the night were as if I was slowly slipping down an endless declivity. The musquitoes were savage and bloodthirsty.

October, 7th—Cool and misty morning. To avoid entering the water Santos cut a pathway through the undergrowth round the bluff, and whilst doing so discovered a slab of sandstone having a peculiar character cut in its external face, somewhat resembling the figure 3, chiselled a half inch deep. The slab is six feet long by three and a half feet high, and the cutting showed every indication of antiquity. When or by whom cut can only be surmised. Possibly the Jesuits in descending from their mission Corazon Viejo left this mark, or it may have been cut by the Aborigines, who are supposed to have cut those unintelligible marks and characters on the rocks at Sierra Letmerio at the entrance of Lake Gaiba, seen and noted by the Portuguese explorer Captain Serra, and later by Commander F. J. Page, of the U. S. Navy. It may have been made by the Guaycuru Indians on some of their visits to Albuquerque, as Count Castelnau, the French explorer, says that they carve on trunks of trees various strange characters. I will leave this character for some future Champollion, or some decipherer of cuniform and arrow-headed inscriptions to interpret.

Emerging from the woods we walk rapidly along the level ground to the S. E. extremity of the ridge. A few steps from the point took me waist deep in water, and the river approaches close to this point and along the N. E. face of the ridge. This is the point at which Captain Page landed in the steamer Alpha, and we found many stumps of the trees he cut in 1859. Ascended a tree at this point, and as far as the eye can reach to the S. E. is a boundless grassy plain, with an occasional patch of palm, or an island-like clump of trees and shrubbery. S. E. by S. is a long low hill and beyond it a "moro" outliers of this range, which terminates on the Paraguay river at Fort Coimbra.

THE CARAGUATA FIBRE.

April, 13th.

Mr. Edttor,

In yesterday's issue you mention that a new textile plant called Caraguata has been recently discovered, and that the Union Industrial has received information as to its properties and merits. You may remember that when we were fellow-passengers on board the R.M.S. La Plata, four years ago, I shewed you samples of fibre and goods made from the Caraguata and other plants that grow in this country. Since then I have manufactured a large quantity of fibre from this and other plants that grow both in this Republic and Paraguay, and I am about to make a contract for regular supplies from the Chaco, which will be worked up in the mill in San Fernando, so you see no new discovery has been made.

A. E. Newman.

RAILWAY ITEMS.

The Chief of the Engineers' Department has forwarded to the Minister of the Interior the report of Inspector Hernandez on the collision that recently took place at Rufino Station between freight train No. 19 and the combination passenger train No. 27, resulting in the complete destruction of 2 freight wagons belonging to the Argentine Great Western and one belonging to the Pacific: a 2nd class carriage on the luggage train and the restaurant car on the passenger train were likewise damaged; the total damage to the rolling stock is estimated at $2500. The report states that the persons responsible for the accident are the station-master at Rufino and the driver of the passenger train.

Engineer A. Seidler, the Inspector-General of the Central Northern Extension and Branches, having received leave of absence, the Council of Public Works have appointed Engineer L. Chiappa to take charge provisionally of the post and to continue the task of winding up the works as ordered by Engineer Seidler.

The Chief of the Public Works' Department has sent a memorandum to the Executive from the manager of the Dean Funes-Tuclame line showing the deficiencies on this branch when handed over, including a house for the manager and another for offices, a passenger station, workshops, deposits, repairing-sheds for locomotives and carriages, and tools—all of which are indispensable for the proper working of the line. The Department, recognising the necessity of these wants being supplied, has ordered the General Inspection Office of the Branch to draw up a list of the same. The Department likewise considers that the N. R Board should supervise the due execution of these works.

Sr. Pirovano has called the attention of the Manager of the Central Argentine to the necessity of cleaning and putting in order the conduits and drains on the Buenos Aires section of his line, as also that the building of Victoria Station should be proceeded with more quickly, in accordance with the last monthly report of the technical Inspector.

The Public Works' Department has advised the Executive to assent to the petition of the Catalinas' Company for permission to extend the junction of their branch with the lines on the South Dock, subject, however, to conditions to be laid down by the Hydraulic Works and Railway Inspection Offices.

EDITOR'S TABLE.

See-saw again. We noticed a more cheerful feeling amongst our fellow creatures yesterday, and could only attribute it to the mild fall in the gold premium. The joy which a few points decline in the gold rate causes amongst the optimists and general public is quite touching, and rejoices every philantropic heart. The fall was occasioned by a decree issued by the Government raising the State of Siege, it being considered that there was no further necessity for its continuance.

The news from Chile is of the indefinite order. The fight has now reached a North and South stage, Congress holding the former and the Dictator the latter part of the Republic. The latter's troops cannot go North, so the patriots must come down and try conclusions with them; but some time must elapse before they are face to face for the decisive tussle.

We are happy to be able to state that most of the Naposta men and boys are now provided with clothes, thanks to the generosity of the public; but a few more odds and ends of male attire would not come in amiss, as winter is at hand.

Politicians say that Congress will meet this year on the fixed legal date, May 1st, as the collective wisdom is anxious to fight out the Battle of the Banks as soon as possible. So best, and have it over. Most of the honourable legislators are already in town, "their souls in arms and eager for the fray."

Another good effect of the bad crisis. An order has has been issued that, for the future, the troops of the garrison are to attend Mass on Sundays and church festivals, at the nearest church to their respective barracks.

The German Reichstag is likely to see lively times in its next session, now that the grand old man of "blood and iron" has been returned as member for Hanover. It will be a case of the bull in the china shop.

Amongst the eclipses and other celestial events of this year, to which we recently referred, must be added a post-script, in the shape of a heavy shower of stars, on November the 15th. The umbrella makers should look sharp and provide something specially stout for the occasion; otherwise the Argentine hat will stand a good chance of being battered in, to say nothing of the heads under it.

President Herrera has sat on all the port schemes submitted to him, and has resolved that Montevideo can very well jog along with its old harbour till times improve. This is sensible.

Bickhert's new theatre and tavern rolled into one in Corrientes—Esmeralda is going up with the rapidity of greased lightning. It will be a very imposing looking structure; but there is such a lot of cast-iron in it that the bare mention of the word fire in connection with it makes one turn pale; but there need be no cause for fright, as every inch of the edifice is covered with an incombustible mortar, a new invention that sets the Fire Fiend at complete defiance. Some of the doors appear to us to be very small for the size of the building.

Messrs. McGregor Aitken & Co. of Calle Parana had a visit from a deputation of thieves the other night, and are minus some goods and money, but not very much. Burglary is increasing in the city in a most unpleasant ratio.

They had a mild "caso sospechoso" scare in Montevideo on Thursday in the person of a little girl from Rio, who looked suspiciously yellow in the face; but after the usual fuss and flurry it was declared that she had only eaten too much, as children sometimes do, and had an indigestion.

The whole town appears to be rushing to the succour of the Foundling Hospital, though not a few people think it would improve public morality if that institution were allowed to go quietly to the wall. However, bankers, merchants, brokers, clubs and all sorts and conditions of men are in the field collecting and subscribing to save it; so it has a better chance of salvation than even the Provincial Bank.

The cartmen and "troperos" intend to hold a meeting on Sunday next to coax the Lord Mayor to reduce the present monstrous tax on their vehicles. We greatly fear that his lordship will not do it, but there can be no harm in trying.

There is a flaming row going on in Rosario between our brother of the pen who runs the *Municipio* and one of the Judges. Our colleague disclosed the shocking state of the administration of justice in Rosario; and the Judge wrote a letter to him explaining that things were not so bad; our colleague laughed at the Judge and his epistle, whereupon his worship ordered his arrest for contempt of court; but our colleague took the train and is now in this city. So the quarrel stands.

Childs, Saunders and Co. have offered to sidewalk (nice new verb) the whole city for thirty years with Victoria stone at a price which we believe is only a third of what our great and good Municipality now pays for the same work with the old granite blocks. This is no child's play for the empty city Treasury; and the sooner G. S. and C's. sporting offer is closed with the better; as Victoria stone is known to have as lasting qualities as the grand old Royal and Imperial lady whose name it bears.

The poor tramways. Coppers are again scarce, and, as usual, the unfortunate guards are being most foolishly and unjustly rated by some of our contemporaries, who threaten the companies with something awful if some plan be not adopted to supply the want of small change. Tramway shareholders have such hard times now that it is unkind to add to their woes, but they certainly had a high old time of it for several years.

Letters from Berlin say that when Dr Plaza was in Berlin he was presented to the Emperor and was invited to a jollification at the Imperial Palace, where His Majesty asked him a good many questions about this country, and his numerous subjects here. How is it that Dr. P. has not yet been invited to put his legs under the Royal mahogany at Windsor Castle? Surely the Queen cannot have been unfortunate enough to invest in Cedulas P or National Banks. It is said that the ex-Empress Eugenie did, by Baring's advice

Among the passenger by the R. M. S. Thames, which left on the 15th inst., we note Mr. Meldrum, Chief Engineer of the new branches of the Great Southern Railway and wife. We wish him a happy voyage and hope to see him back soon.

The Choral Union have elected the following gentlemen as their new Committee: President, Mr. Nicholson; Vice President, Dr. G. Newland; Messrs Mackern, Holtum, Samson, Goode, Begg, Mayne, Showler, Pittener, Grassie and Harrison.

The La Plata Government is now in a hysterical fit of retrenchment, and began furiously yesterday in the Agronomic line, by dismissing a number of professors of farming, clerks, vets, gardeners, porters, and scores of people holding posts that, from the names attached to them, must have been pure sinecures. No wonder that the La Plata Treasury, its banks and "toute la boutique" have gone to the three Ds., if all departments of Government are as crowded with hands as the Agronomic. A number of distinguished architects and what we call in England "Inspectors of Public Buildings" were also turned out, and are now singing Tommy Moore's most exquisite of melodies, "My lodging is on the cold ground."

Mr. Astor's yacht, the Grant, has left for Montevideo; she goes next to Rio, and then due east to "Afric's burning shore."

When a woman falls in love you can't make her believe that all men are alike; and when she has been married ten years you can't make her believe that they are not.

The Parana Islands are now the head quarters for smuggling operations, and the coast-guard "boss" at the Tigre says he is powerless in the matter, as he has neither men nor arms to tackle the smugglers, so he has taken to reading Virgil's first book of the Eneid as the next best thing to do under the circumstances.

Patti will sing in Rio in the coming winter at £1,500 per night. We paid her more than that when she was here; and she ought (now that we are all in the hard-ups) to take a run down from the Fluminense capital and give the two concerts for charity which she forgot to give when the town was off its feather head about her, and filling her pocket with the gold which ex-Minister Varela threw out of the window with as light a heart as Ollivier had when he advised his Imperial master to tackle the Germans.

It makes one tearful to see how some of our London contemporaries, Bond and Cedula holders, etc., etc. hugged the Patriotic Loan to their anxious bosoms as the long-sought plank of salvation and turning point for Argentine financial troubles. Alas and alack a day! The Bombshell decree must have dashed their hopes into the middle of next year. In his long career as money-lender in chief of this sublunary sphere, never has poor John Bull had to swallow such drenching doses of hope and fear, on the top of each other, as Señorita Argentina has given him since she started her crisis.

We have to thank a kind friend for sending us a Gibraltar paper with a long account of the loss of the Utopia, which pressure on our space forces us to hold over for our next issue.

CAMP AND STOCK IN MERCEDES.

On Saturday, the 25th of April, at 2 p.m., at our offices, we will sell by auction, by order of the proprietor, a splendid lot of

441 Squares

of superior camp, well wired in, and with 3 good brick houses, distant only 2 leagues from the town of Mercedes and about the same distance from 4 railway stations. The camp has a mortgage on it of 14,200 Provincial Cedulas, Serie L, with which the purchaser can remain paying the difference between the market and nominal value of the Cedulas. At the same time we will sell the existing stock—that is, about 200 good mestizo Hereford milch cows, with an imported bull and 60 saddle and drought horses.

Base—The Cedulas.

NOTE—5 o/o guarantee will be exacted from the purchaser on signing the boleto.

NOTE—To inspect the camp and stock apply to the Hotel Nogues, Mercedes, or to our office.

and at the same time a great variety of fine *WINES AND LIQUEURS,* from the vaults of the same firm on

Monday, the 27th of April,
At 8 o'clock at night,

AT THE ABOVE ADDRESS.

On the day and at the hour named we will sell by auction, by order of and on account of the firm named, a splendid variety of cigars, guaranteed legitimate Havanas of the brands most in favour to-day, i.e., Hoyo de Monterey, Bock, Upmann, Murias, Henry Clay, Partagas Legitimidad, La Española, La Venus, etc. A large stock has to be liquidated and they will be offered in small lots to suit all parties, so offering a rare opportunity to smokers of good brands to supply their requirements at low prices with the satisfaction of knowing that what they buy is a genuine article guaranteed by so respectable a firm as the one in question. In these hard times when smoking has become a luxury beyond the means of most people, nobody should miss the opportunity now offered of securing a good supply

At the same time

we shall sell by auction a variety of magnificent wines and liquors, viz., Champagne Bordeaux, Burgundy, old Ports Sherry, Red wines and many others too numerous to mention in detail, all from the cellars of the above mentioned firm.

For further particulars apply at our office

AWARDED OVER 1000 PRIZES

"THE STAMFORD"

There was a very radical change in the state of affairs at the second hour and gold came tumbling down apace, the price collapsing to 54.90 and closing with sellers at 55.30, which gives an equivalent of 340. Sovereigns were freely sold from 17¼ down to 17.15 which was the closing quotation. To account for the fact it was said that President Pellegrini had assured Governor Costa that there will be no further paper issues, and although it is generally agreed that the conference to-day must have hinged on this capital point, it is by no means certain that the report is true. However, the feeling in the market was vastly improved, and the consequence was a fall of the precious metal. Stocks shewed no change, though there was a slight revival of animation in Constructors.

The following is a summary of the business effected in stocks and shares to-day at the second ring :—

In another column will be found extracts from the speech of the chairman at the meeting.

The movement in the Central Produce Market yesterday, April 16th, was as follows :—

Arrivals, 22 wagons, containing 5,000 kilos of salted cowhides and 118,920 kilos of wheat.

Eight wagons cleared with 48,000 kilos of hard-wood sleepers.

Total weight, 171,920 kilos.

From the shipping circular of Messrs. John Norton's Son, 90, Wall-street, New York, we take the following list of exports from the United States and the British provinces to the River Plate ports :—

The s.s. Nord America, which cleared last night for Italy direct, takes 1,200 steerage and 80 cabin passengers.

The s.s. Matteo Bruzzo is expected in port to-day, and will clear on 20th inst. with 1,500 passengers, principally for Rio and Santos.

At the sitting of the La Plata Senate yesterday, the Cedula and enlargement of town projects were taken up and passed at first reading, the Minister of Finance being present. There was no show of opposition in either case, and it is very probable that the second reading will be got over to-day. This will put fresh life into Cedulas, as it will bring the various series to a level.

The following were the prices quoted in the meat and produce markets yesterday :—

Just published.

The new and enlarged edition of Mulhall's Dictionary of Statistics is now being issued by Messrs. Routledge and Sons, London, in monthly numbers, price half-a-crown. The first number appeared in January, the work to be completed in 10 numbers. Each number has a full-page diagram frontispiece, the book being uniform in type and appearance with Chambers Encyclopedia. It is the largest and most comprehensive work of statistics yet published in any language, embracing all subjects and all countries.

Messrs. Jacobsen expect the first and second numbers shortly.

WOLSELEY SHEEP SHEARING MACHINE COMPANY LIMITED.

El Recreo, Azul, Marzo 3 de 1891.

Sres. AGAR, CROSS & CO., Calle Defensa 136.

Muy Señores Mios,

Tengo el gusto de comunicar a Vds. que las 4 maquinas de Esquilar sistema Wolseley me han dado un resultado satisfactorio y no quería darles este informe hasta no haber concluido con la esquila de borregas. La maquina trabaja bien, esquilamos con facilidad cualquiera oveja por mas fina y arrugada que sea: saca mas lana que la tijera y tiene la ventaja de no cortar, pero si en algunos casos rasguña descuidandose el esquilador. Estas l stim duras sanan facilmente, y se ha en cada vez menos cuanto mas practica se adquiere. No he notado que se me hayan muerto animales por esta causa.

Convencido de su eficacia pienso colocar doce aparatos para la proxima esquila y creo poder hacer facilmente el trabajo con ellos. Puedo asegurar a Vds. que los esquiladores mas torpes aprenden facilmente, prefiriendolas a la tijera.

Pueden Vds. darle la publi idad que gusten.

At the Estancia Grande, the property of GEORGE BELL, there are always on Sale Clydesdale and Cleveland Stallions, Durham Bulls, and Lincoln Rams, also Potros suitable for carriages and heavy draught.

As all animals offered for sale at this Estancia are by stallions, bulls, etc., imported direct from England by the owner, it would therefore be advantageous for intending purchasers to inspect the same before purchasing elsewhere.

Nearest Station (under a league from the Estancia) EMPALME PEREIRA F.C. a La Plata from whence animals can be despatched to any part of the Republic.

Animals of the same breeds are obtainable at the Estancia La Favorita. Apply to the Mayordomo, Almacen La Luz. Carrera Tandil a Necochea, or to Hotel Dieses, Tandil. Also at Estancia Santa Catalina. Apply Mayordomo, San Jose de la Esquina, F.C.O.S. Rosario.

Self-Registering Recording Clock.

This clock serves to test employees in warehouses, hospitals, parks, prisons, etc., and in general for watching over every kind of undertaking, such as railways, factories, workshops, etc., also for villages, towns and cities and for police and on storm & house service. Not only is it an exact timekeeper but at the same time shows clearly at a glance the special watching service on which it is used. It shows on a slip of paper the hour and minute at which it started how much time has been employed from one point to another, and in what direction the rounds have been made. As this clock cannot get out of order, it is an infallible inspector which cannot be influenced by anybody or anything and also contributes to avoid conflagrations and other losses, and to prevent robberies, frauds and crimes.
